1: Identification of the Preparation and Company Name

<table>
<thead>
<tr>
<th>Product Name:</th>
<th>Rat and Mouse AMH ELISA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Part Number:</td>
<td>AL-113</td>
</tr>
</tbody>
</table>
| Manufacturer: | Ansh Labs  
445 Medical Center Blvd  
Webster, TX 77598  
U.S.A. |
| Emergency Telephone Number: | 281.404.0260 |

2: Composition of Kit Components

3: Hazards Identification

A: Potential Biohazard
The Calibrators and Controls are formulated with a buffer base and Rat antigen. Bovine serum has been derived from US origin and processed in USDA licensed facilities, and are free from known infections, however, it should be considered that no available test method can offer complete assurance of eliminating potential bio-hazardous risk.

Bovine products (BSA) have been derived from US origin and processed in USDA licensed facilities, and are free from known infections, however, it should be considered that no available test method can offer complete assurance of eliminating potential bio-hazardous risk. The antibodies are from monoclonal origin and are free from human or animal source.

B: Chemical Hazard
Some of the buffer formulations may contain sodium azide (0.09%). Concentrated Sodium Azide may react with copper and lead plumbing to form explosive metal azides. May react with acids to form explosive hydrazoic acid. If drain disposed, flush with large amounts of water to prevent azide build-up.

The TMB Chromogenic Substrate containing TMB is formulated with DMSO, an irritant and mucous membranes. In case of contact with any of these reagents, wash thoroughly with water. TMB is a suspected carcinogen.

Stop Solution is an acidic and corrosive agent. Avoid contact with skin. Mentioned reagents have been formulated to a non-hazardous concentration and it is not necessary labelling as dangerous components.

4: First Aid

A: Skin Contact
Remove contaminated clothing and wash the exposed skin area thoroughly with soap and water.

B: Eye Contact
Flush with copious amounts of water for at least 15 minutes. Seek medical attention.

C: Inhalation
Remove to fresh air, give oxygen if breathing becomes difficult and seek medical attention.

D: Ingestion
Flush mouth with copious amounts of water, provided that the person is conscious and seek medical attention.

5: Measures in Case of Fire

A: Suitable Extinguishing Media
Chemical or water fire extinguisher.

B: Extinguishing Media Not to be Used
None known.

C: Special Fire Fighting Procedures
None known.
D: Unusual Fire and Explosion Hazards
N/A

E: NFPA Rating
Health: 2
Flammability: 0
Reactivity: 1

6: MEASURES IN CASE OF ACCIDENTAL SPILL
A: Body Precautions
Wear rubber gloves, impermeable shoe covers and long laboratory coat.

B: Environmental Precautions
Contain the spill to the smallest area possible.

C: Cleaning Measures:
None known.

D: Unusual Fire and Explosion Hazards
Take care not to contaminate body. Absorb the material with disposable towels. Soak area with a 10% bleach solution and wipe up with disposable towels. Dispose of all contaminated trash in accordance with local regulations.

7: MANIPULATION AND STORAGE
A: Manipulation
Wear suitable personal protective equipment. Take care not to splash spill or splatter reagents. Do not eat, drink, smoke or apply cosmetics in laboratory areas. Do not pipette samples or reagents by mouth.

B: Storage
Store the test kits in 2 – 8°C refrigerators as designated and labelled to contain human blood products.

8: EXPOSURE CONTROLS / PERSONAL PROTECTION
A: Body protection
Wear long laboratory coat.

B: Respiratory Protection
In case of fire, wear self-contained breathing apparatus.

C: Hand Protection
Wear non-permeable rubber, neoprene, latex or nitrile disposable gloves. Change gloves when they become
contaminated.

D: Eyes Protection
Wear safety glasses or goggles when a splash hazard exists.

9: ECOLOGICAL EFFECTS
None known.

10: DISPOSAL REQUIREMENTS

A: Disposal of Preparation Left
Dispose according to current regional and national rules.

B: Contaminated Containers
Dispose of following current regulations.

11: TRANSPORTATION INFORMATION (Due to the sulfuric acid preparation in the kit)

A: Road / Railway Haulage ADR/RID
Class 8, Corrosive, limited quantity of material, accepted package.

B: Sea Freight IMO (IMDG)
Class 8, Corrosive, limited quantity of material, accepted package.

C: Air Freight IATA (ICAO)
Class 8, Corrosive, limited quantity of material, accepted package.

D: UN Number
2796

12: INFORMATION ON REGULATION

A: Classification
This preparation is classified and labelled in accordance with applicable national and international regulations.

B: Symbols of Danger
N/A

C: “R” Phrases Indicating Specific Risks
Irritant: R36/37/38, Irritating to the eyes, respiratory system and skin.
D: “S” Phrases Indicating Caution

S26, In case of contact with any reagents rinse with copious amounts of water for at least 15 minutes. If irritation persists, seek medical attention.  S36, Wear suitable protective clothing.

13: OTHER INFORMATION

Recommended Use

For research or clinical investigational use only.
Not for use on or in human and animals. Information contained in this MSDS relies upon our best knowledge of the product upon issue of this document to describe the use, storage, transport and disposal under safe and secure measures. Such information is not a guarantee of the characteristics and specific quality of the product. This MSDS concerns the stated preparation and cannot apply to the product if used with other materials or in a process other than those specifically stated.
